

## Radius Payment Solutions Ltd

Radius is one of Europe's largest Fleet Service Companies. With offices and customers located in 11 countries, we provide on-road vehicle solutions to a wide range of Businesses. Our own-brand fuel offering is accepted in 19 European countries, and we also provide accompanying toll solutions in many of these, along with supporting products such as engine lubrication oil and vehicle wash facilities.

A key objective of PSD2 is to ensure Businesses and Consumers are adequately protected when using and interacting with the services offered to them. From the perspective of Radius Payment Solutions, we operate under Limited Network Exemptions in all countries (3(k) – a very limited range of goods are offered). Fleet Cards issued by us are accepted only by a limited number of service stations & cannot be used outside of these, the cards are also heavily controlled and restricted to grant access to a limited number of products (as described above).

The ongoing relationship we have with our customers is extremely valuable, in an industry where alternatives are readily available, we work closely with them, and their interests are our number one priority if we are to maintain a long-term partnership over many years.

Radius Payment Solutions is a founding member of the Fleet Cards Europe Association (FCE) and as such have also contributed to the consultation submission being made by the FCE on behalf of all of its members.
