### Targeted consultation on the review of the Directive on financial collateral arrangements

Fields marked with \* are mandatory.

### Introduction

#### **Background to this consultation**

The Financial Collateral Directive (FCD) was adopted on 6 June 2002 and introduced a harmonised framework for the use of financial collateral to secure transactions: By doing so, it contributed to enhancing cross-border use of financial collateral. Prior to the FCD, only collateral security provided to a central bank or in connection with participation in a payment or securities settlement system covered by the SFD (SFD system) was protected by EU law in the event of the insolvency of the collateral giver. A more comprehensive approach covering also OTC transactions was deemed necessary because divergent national rules applicable to financial collateral were frequently impractical and often nontransparent. They resulted in uncertainty as to the effectiveness and enforceability of 'financial collateral arrangements'. also as a means of protecting cross-border transactions. The FCD protects collateral takers notably by: ensuring that financial collateral arrangements can be mobilised and realisable without delay due to national formalities; providing for close-out netting provisions to be enforceable in accordance to their terms and ring-fencing the operation of financial collateral arrangements should one of the parties become insolvent. Where applicable, these protections may constitute exceptions to the principles of equal treatment of creditors upon the opening of insolvency proceedings and universality of insolvency proceedings. In such a way, they help to avoid systemic contagion risks throughout the EU. The FCD does not fully harmonise national laws applicable to financial collateral arrangements but partially harmonises certain provisions whilst dis-applying others. By doing so, the FCD aims to remove barriers to the timely cross-border creation and operation of such arrangements.

Article 12a of the <u>Settlement Finality Directive (SFD</u>) requires the Commission to report on the SFD by 28 June 2021. To this end, <u>the Commission is reviewing the SFD</u>. Since the FCD is closely related to the SFD, the Commission has decided to review the FCD in parallel. For the FCD to continue to serve its purpose, it is important to consider developments that could affect its functioning and to ensure coherence across legislative frameworks. Relevant issues can arise from market developments (economic, financial or technological) and/or regulatory changes. Two issues that are dealt with in this consultation are also important for the SFD: recognition of 'close-out netting provision' and 'financial collateral' ('cash' and 'financial instruments' the two most commonly used forms of 'collateral security' under the SFD). The Commission does not intend to deal with the (re-) use of financial collateral given under 'security financial collateral arrangement' by the collateral taker in this review because it was recently addressed in the Securities Financing Transactions Regulation (SFTR), which provided for improved transparency and monitoring. As reporting under the SFTR only started in July 2020, it is too early to draw any conclusions . A first discussion with Member States on both, SFD and FCD related issues, took place in October 2020.

#### Responding to this consultation

The purpose of this consultation is to receive stakeholders' views and experiences regarding the functioning of the FCD. The responses to this consultation will provide important guidance to the Commission services in preparing a legal proposal where appropriate.

Please note: In order to ensure a fair and transparent consultation process only responses received through our online questionnaire will be taken into account and included in the report summarising the responses. Should you have a problem completing this questionnaire or if you require particular assistance, please contact <u>fisma-sfd-fcd-review@ec.europa.eu</u>.

The Commission will publish all contributions to this public consultation. You can choose whether you would prefer to have your details published or to remain anonymous when your contribution is published. Fo r the purpose of transparency, the type of respondent (for example, 'business association, 'consumer association', 'EU citizen') country of origin, organisation name and size, and its transparency register number, are always published. Your e-mail address will never be published. Opt in to select the privacy option that best suits you. Privacy options default based on the type of respondent selected

#### Contribution publication privacy settings

The Commission will publish the responses to this public consultation. You can choose whether you would like your details to be made public or to remain anonymous.

### Anonymous

The type of respondent that you responded to this consultation as, your country of origin and your contribution will be published as received. Your name will not be published. Please do not include any personal data in the contribution itself.

### Public

Your name, the type of respondent that you responded to this consultation as, your country of origin and your contribution will be published.

### \* Contribution publication privacy settings

The Commission will publish the responses to this public consultation. You can choose whether you would like your details to be made public or to remain anonymous.

### Anonymous

Only organisation details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published as received. Your name will not be published. Please do not include any personal data in the contribution itself if you want to remain anonymous.

### Public

Organisation details and respondent details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published. Your name will also be published.

I agree with the personal data protection provisions

### 1. Scope

The scope of the FCD determines who benefits from its protections. It has to be considered carefully, since the removal of national safeguards to the enforcement of financial collateral arrangements could contribute to moral hazard. At the same time, to achieve the FCD's objective of avoiding systemic risk, the scope of the FCD should cover systemically important collateral takers and providers.

To benefit from the FCD's protections, the collateral taker and the collateral provider must be covered by the FCD. The following are currently within the FCD's scope: public authorities; central banks; financial institutions; central counterparties; settlement agents and clearing houses. In addition, a person other than a natural person (including unincorporated firms and partnerships) can also be within the FCD's scope, provided that the other party to the financial collateral arrangement is one of the afore-mentioned entities (Article 1(3) FCD). Member States can opt-out of the latter provision. By applying this opt-out, Member States are able to exclude from the scope of the FCD financial collateral arrangements entered into by SMEs with their credit institutions for instance, that primarily belong to the retail rather than wholesale financial markets covered by the FCD.

Furthermore, new financial entities have emerged in the EU capital markets acquis (e.g. payment institutions, e-money institutions or central securities depositories) which are currently not covered by the FCD and could be considered to be included in the scope.

Question 1.1 Should the personal scope of the FCD be amended to include the following entities:

### a) Payment institutions?

- Yes
- No
- Don't know / no opinion / not relevant

### Please explain your anwer to question 1.1 a):

5000 character(s) maximum

### b) E-money institutions?

- Yes
- No
- Don't know / no opinion / not relevant

#### Please explain your anwer to question 1.1 b):

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

#### c) Central securities depositories?

- Yes
- No
- Don't know / no opinion / not relevant

#### Please explain your anwer to question 1.1 c):

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

#### d) Any other entity(ies)? Please explain:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

## Question 1.2 Do you agree with maintaining the current rationale that only financial collateral arrangements should be protected where at least one of the parties is a public authority, central bank or financial institution?

۲

Yes

No

Don't know / no opinion / not relevant

### Question 1.2.1 Please explain why and how the rationale should be changed in your opinion:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 1.3 Does the exclusion in Article 1(3) (allowing Member States to exclude retail/SME from the scope of the FCD) present any problems to the cross-border provision of collateral in your opinion?

Yes

- No
- Don't know / no opinion / not relevant

### Question 1.3.1 Please explain why the exclusion in Article 1(3) presents any problems to the cross-border provision of collateral in your opinion:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 1.4 Should the FCD be exclusively applicable to the wholesale market (i.e. turning the national opt-out for retail/SME granted under Article 1 (3) into a binding FCD provision)?

- Yes
- No
- Don't know / no opinion / not relevant

Question 1.4.1 Please provide an explanation/further information if you would like to:

### 2. Provision of cash and financial instruments under the FCD

The FCD applies to financial collateral once it has been provided and if that provision can be evidenced in writing. Where the FCD says 'provided' and 'provision' what is meant is that the financial collateral must be delivered, transferred, held, registered, or otherwise designated so as to be in the possession or under the control of the collateral taker or its representative. The question was raised whether the concepts of 'possession' and 'control' in the FCD are sufficiently clear or might need further clarification.

In case <u>C-156/15 (Judgment of the Court (Fourth Chamber) of 10 November 2016. 'Private Equity Insurance Group'</u> <u>SIA v 'Swedbank' AS - "Swedbank decision"</u>) the Court of Justice of the European Union underlines that the FCD does not specify the circumstances in which the criterion requiring the collateral taker to be in 'possession' or 'control' of collateral is fulfilled in the case of intangible collateral, such as monies deposited in a bank account.

Furthermore, the FCD does not explicitly specify how the provision of financial collateral consisting of "claims relating to or rights in or in respect of" financial instruments (e.g. dividend or interest) which are provided as financial collateral separately from the underlying financial instruments in a security financial collateral arrangement should be evidenced.

Moreover, in the context of title transfer financial collateral arrangements, the lack of harmonised rules on good faith acquisition might undermine the legitimate expectations of a good faith acquirer.

# Question 2.1 Do you see the need to specify the ways in which financial collateral such as dividend or interest ("claims relating to or rights in or in respect of") could be evidenced in writing when it is provided separately from its financial instrument?

- No, there should be flexibility
- Yes, an explicit provision would be helpful
- Don't know / no opinion / not relevant

#### Question 2.1.1 Please explain how this could be done:

5000 character(s) maximum

Question 2.2 Do you think that the concepts of 'possession' and 'control' in the FCD require further clarification?

- Yes
- No
- Don't know / no opinion / not relevant

Question 2.2.1 Please explain why you think that the concepts of'possession' and 'control' in the FCD require further clarification and forwhichtypetypeofcollateral.

#### Please elaborate how this should be done in your opinion:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### Question 2.3 Do you believe that the notion of a good faith acquirer within the EU should be further clarified in the FCD?

- Yes
- No
- Don't know / no opinion / not relevant

### Question 2.3.1 Please explain how this might be done for 'cash' and 'financial instruments':

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### 3. 'Awareness' of (pre-)insolvency proceedings

The FCD provides in Article 8(2) that Member States must ensure that "where a financial collateral arrangement or a relevant financial obligation has come into existence, or financial collateral has been provided on the day of, but after the moment of the commencement of, winding-up proceedings or reorganisation measures, it shall be legally

enforceable and binding on third parties if the collateral taker can prove that he was not aware, nor should have been aware, of the commencement of such proceedings or measures."

The <u>European Post Trade Forum (EPTF</u>) pointed out that it was not clear as to what exactly was protected by Article 8 (2) of the FCD (EPTF's 2017 report, sub-sub-section 1.2.1, 2nd bullet point, p. 76.), mainly in the context of OTC financial collateral arrangements. In practice, it would be difficult for a collateral taker to prove that he was not aware nor should have been aware of the aforementioned proceedings.

### Question 3.1 Do you see the need to clarify how 'awareness' of (pre-) insolvency proceedings under Article 8(2) of the FCD is determined?

- I see the need to clarify how a collateral taker can 'prove that he was not aware'
- I see the need to clarify how a collateral taker can 'prove that he should not have been aware'

### Please explain how in your opinion clarifying how a collateral taker can 'prove that he was not aware' could be done:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### Please explain how in your opinion clarifying how a collateral taker can 'prove that he should not have been aware' could be done:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### 4. Recognition 'close-out netting provisions' in the FCD and its impact on SFD systems

Close-out netting is an arrangement commonly used in financial markets, to set off and replace all agreed but not yet due liabilities and claims vis-à-vis a counterparty, by one single claim/liability. It ordinarily covers instances where a counterparty defaults or becomes insolvent. It is commonly used alongside a contract termination provision. Close-out

netting is important for the efficiency of financial markets, as it reduces credit exposures from gross to net. By doing so, it enables financial institutions to reduce their settlement, counterparty credit and liquidity risks. It thereby reduces systemic risk.

The FCD acknowledges the importance for market participants to be able to rely on a legally protected close-out netting mechanism in the event of the (pre-) insolvency of their counterparty. This is done by providing that a "close-out netting provision can take effect in accordance with its terms", notwithstanding the onset of (pre-) insolvency proceedings vis-à-vis other counterparties and without regard to other matters that might otherwise affect the rights arising from a close-out netting provision. SFD systems rely on the FCD to protect their close-out netting provisions, notably in the context of their default management arrangements should a participant default, come under resolution or be subject to (pre-) insolvency proceedings. Therefore, any uncertainties regarding the enforceability of close-out netting under the FCD could also have a knock-on effect on SFD systems.

Nevertheless, the EPTF's 2017 report states that the FCD does not sufficiently protect close-out netting provisions in cross-border settings since parties still need to carry out due diligence in order to ascertain whether a close-out netting provision is enforceable in case of the insolvency of the other party. This is because the FCD is silent as to the application of avoidance actions in (pre-)insolvency proceedings to a close-out netting provision<sup>1</sup>. By contrast, avoidance action is expressly dis-applied to 'netting'<sup>2</sup> in the SFD (Article 3(2) SFD).

The Bank Recovery and Resolution Directive (BRRD - Directive 2014/59/EU), amended the FCD to include Article 1(6) of the FCD which was then amended by the Framework for the Recovery and Resolution of Central Counterparties (CCP RR - Regulation (EU) 2021/23). Article 1(6) of the FCD dis-applies the protections in Article 7 (Recognition of close-out netting provisions) of the FCD to any restriction on the enforcement of a close-out netting provision including any set-off that is imposed by virtue of a resolution action of a resolution authority. Under the BRRD and the CCP RR such restrictions are subject to the respect of specific safeguards. Article 1(6) of the FCD is intended to avert the immediate enforcement provision as provided for in the FCD so as to not precipitate the failure of a systemic institution and jeopardise any effective resolution. Thus, it intends to reconcile the operation of close-out netting arrangements with the effectiveness of resolution of banks and CCPs to the benefit of financial stability. However, the EPTF raises the issue that the BRRD might create uncertainties<sup>3</sup> as to whether a close-out netting provision is enforceable in accordance with its terms under the FCD in the context of the resolution of a financial institution.

<sup>1</sup> Article 8(4) FCD. See also Annex 3 of the EPTF's 2017 report, p. 230

<sup>2</sup> Article 2(k) SFD, which refers to multi-lateral netting used in the operation of an SFD system as opposed to close-out netting used for the realisation of collateral security in an SFD system. According to <u>Annex 3 of the EPTF's 2017 report</u>, p. 230, most Member States have used the SFD to protect 'netting' between direct SFD participants and their clients)

<sup>3</sup> EPTF's 2017 report, sub-section 1.1, 2nd bullet, p. 74 as well as Annex 3 of the EPTF's 2017 report, which cites Articles 49, 68, 76 and 77 BRRD, p. 230.

### Question 4.1 Have you encountered problems with the recognition /application of close-out netting provisions?

- Yes
- No
- Don't know / no opinion / not relevant

#### Question 4.1.1. What were these problems related to?

- use within one Member State
- cross-border use
- $\bigcirc$

both

#### Question 4.1.2. What did these problems concern?

- OTC transactions
- transactions carried out on an SFD system
- both

### **Question 4.1.3 Please describe the problems and the outcome:**

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

#### Question 4.1.4 Please describe a solution that you consider appropriate:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 4.2 In case you have collected legal opinions regarding the enforceability of close-out netting: Are they upheld or to be changed in light of the <u>framework for the recovery and resolution of central counterparties</u> (Regulation (EU) 2021/23)?

No

Yes

No legal opinions collected / don't know / no opinion / not relevant

### Question 4.2.1 please specify why and how the legal opinions you have collected were changed:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 4.3 In case you have collected legal opinions regarding the enforceability of close-out netting: Were they upheld or changed in light of the revision of the <u>BRRD (Directive 2014/59/EU)</u>?

Yes

No

No legal opinions collected / don't know / no opinion / not relevant

### Question 4.3.1 please specify why and how the legal opinions you have collected were changed:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

## Question 4.4.1 Do you see legal uncertainties related to close-out netting provisions due to the FCD's silence regarding the application of national avoidance actions to such provisions?

- Yes
- No
- Don't know / no opinion / not relevant

### Question 4.4.1.1 Please explain the legal uncertainties you have identified and how these might be solved:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### Question 4.4.2 Do you see legal uncertainties related to close-out netting provisions by virtue of the introduction of Article 1(6) of the FCD?

- Yes
- No
- Don't know / no opinion / not relevant

### Question 4.4.2.1 Please explain the legal uncertainties you have identified and how these might be solved:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

## Question 4.5 Do you consider that there is a need for further harmonisation of the treatment of contractual netting in general and close-out netting in particular?

- Yes
- No
- Don't know / no opinion / not relevant

Question 4.5.1 Please explain your reasons as well as possible solutions taking into account possible interactions with other national or EU law (e.g.  $\underline{W}$  <u>UD (Directive 2001/24/EC)</u>, <u>BRRD (Directive 2014/59/EU)</u>, <u>CCP RR (Regulation (EU) 2021/23)</u>) and the importance of close-out netting for risk management and the calculation of own funds requirements for credit institutions and investment firms under the CRR:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### 5. Financial collateral

To keep up with market and regulatory developments affecting financial collateral that is currently used or may be used in future by market participants the current list of eligible financial collateral under the FCD ought to be put under review either to broaden or update it.

Possible updates of the definition of financial collateral under the FCD also have an impact on SFD collateral security, which covers all realisable assets including FCD financial collateral. Currently, financial collateral under the FCD consists of cash, financial instruments and credit claims.

In the light of the development of crypto-assets the question arises if the financial collateral definition in the FCD ought to be extended to encompass such so-called stable-coins once they are regulated in the EU (the Commission published a proposal for a Regulation on Markets in Crypto-assets, and amending Directive (EU) 2019/1937). These questions concern especially e-money tokens (which aim to maintain a stable value by referencing one single currency) or asset-referenced tokens (which do so by referencing several fiat currencies, one or several commodities / other 'crypto-assets').

Furthermore, although FCD financial instruments encompass transferable securities, money-market instruments and units in collective investment undertakings that are listed in <u>MiFID 2</u>, the FCD definition differs from the MiFID 2 definition: FCD financial instruments do not include derivatives listed in MiFID 2, except for certain options in respect of shares or bonds; nor do they include emission allowances. The exclusion of emission allowances was due to the fact that they were not in existence when the FCD was first adopted and were only recently listed as financial instruments under MiFID 2.

The FCD intends to be technologically neutral. Therefore, one could assume that financial instruments issued by means of distributed ledger technology (DLT) that fall within the definition of financial instruments of the FCD are within the scope of the FCD and could also be eligible as financial collateral under the FCD. However, questions could arise regarding the FCD requirement that financial collateral must "be in the possession or under the control of the collateral taker or of a person acting on the collateral taker's behalf". To be covered by the FCD, possession or control of the collateral by the collateral taker would have to also be ensured in a DLT environment. According to the public consultation on markets in crypto-assets, possession and control can be challenging in the context of DLT as, in many models, what might constitute legal ownership in a DLT may be unclear. This is primarily a matter for national securities, corporate, contract and/or property law. Moreover, regarding enforcement, respondents indicated that in some cases the enforcement of rights relies on the actions of others (e.g. where private keys from different parties are needed to transfer an instrument and/or validation of transfer requires consensus from different nodes). The aforementioned issues raise the question of whether crypto-assets qualifying as FCD financial instruments should be included within the scope of eligible financial collateral under the FCD (and if so under which conditions) and whether clarifications in the FCD would be needed. Furthermore, there might possibly be the need for clarification whether records on a DLT could qualify as book-entries on a 'relevant account' in relation to 'book-entry securities collateral' under the FCD.

Regarding credit claims it has been suggested by some stakeholders to amend the FCD to exclude a debtor's set-off rights for credit claims that are provided as collateral to central banks. This exclusion should also cover in their opinion any third party to whom the credit claim is subsequently assigned. Set-off rights give the debtor of a credit claim the right to reduce the outstanding amount of its debt by the amount of counterclaims it has against the lender. They are, therefore, important for the debtor in case of an insolvency of the lender. On the one hand, set-off rights pose a risk in taking credit claims as collateral, in particular for central banks. This risk varies across jurisdictions and across banks. It is also volatile as it depends on the daily value of the debtors' counterclaims. Hence, this makes the valuation of a credit claim taken as collateral more difficult. Moreover, the cost of low operational efficiency of such collateral may not

be negligible. As a result, many central banks do not accept credit claims as collateral unless set-off rights are excluded. On the other hand, this might raise legal issues in the context of consumer and debtor protection. Prohibiting set-off would shift the risk of insolvency of the bank, which assigns the credit claim as collateral to a central bank, from that central bank to the original consumer (e.g. account holder) / debtor (e.g. mortgagee). Thus, potentially worsening the debtor's position in the event of the failure of its bank. This could potentially have an impact on the real economy, in particular on households and SMEs.

### **General questions**

### Question 5.1 Do you think other collateral than cash, financial instruments and credit claims should be made eligible under the FCD?

- Yes
- No
- Don't know / no opinion / not relevant

#### Question 5.1.1 If so, please elaborate which type of collateral and why:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### Question 5.2 Do you see the need to update the definitions of currently eligible collateral?

I see the need to update the definition of cash

- I see the need to update the definition of financial instruments
- I see the need to update the definition of credit claims

#### Please explain why and how updating the definition of *cash* should be done:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### Please explain why and how updating the definition of *financial instruments* should be done:

5000 character(s) maximum

### Please explain why and how updating the definition of *credit claims* should be done:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### **Financial instruments**

### Question 5.3 Should emission allowances be added to the definition of financial instruments in the FCD?

- Yes, they are a commoly used financial collateral and should therefore be eligible as collateral under the FCD
- No, emission allowances do not provide a sufficiently stable value to be used as financial collateral under the FCD
- Don't know / no opinion / not relevant

Question 5.4 For crypto-assets qualifying as financial instrument, would you see a need to specify the ownership, provision, possession and control requirements of the FCD further for a DLT context in order to provide legal certainty as to the question whether they are covered within the FCD?

- Yes
- No
- Don't know / no opinion / not relevant

Question 5.4.1 Please elaborate on how this might be done in a manner that is compatible with national laws regarding securities, companies, contracts, property and book-entry:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Question 5.5.1 Should the notions of *'account'* be retained, replaced or further clarified/specified for the purposes of evidencing the provision of cash or securities collateral provided through DLT?

- Retained
- Replaced
- Further clarified/specified
- Don't know / no opinion / not relevant

### Question 5.5.1.1 Please explain why you think so and how this matter might be solved:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

## Question 5.5.2 Should the notions of '*book-entry*' be retained, replaced or further clarified/specified for the purposes of evidencing the provision of cash or securities collateral provided through DLT?

- Retained
- Replaced
- Further clarified/specified
- Don't know / no opinion / not relevant

### Question 5.5.2.1 Please explain why you think so and how this matter might be solved:

5000 character(s) maximum

### Question 5.6 Are there any other issues you would like to address regarding FCD financial collateral in a DLT environment?

- Yes
- No
- Don't know / no opinion / not relevant

### Question 5.6.1 Please elaborate on how this might be done in a manner that is compatible with national laws regarding securities, companies, contracts, property and book-entry:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### **Credit claims**

### Question 5.7 In your opinion, do existing provisions on set-off create a problem for the provision of credit claims as collateral?

- Yes
- No
- Don't know / no opinion / not relevant

### Question 5.7.1 What is the context of this problem?

- national context
- cross-border context
- both of the above

### Question 5.7.2 Do you see the need to remove a debtor's set-off rights? Please consider the set-off risks against the risks to households and SMEs in the event of the insolvency of a credit institution?

- No, it is for the collateral taker to decide what kind of collateral they accept and ensure appropriate risk mitigation where applicable
- Yes, it removes operational burden and enhances legal certainty for the collateral taker which rectifies the weakening of debtor's set-off rights

### Question 5.7.2.1 Why do you see the need to remove a debtor's set-off rights?

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### Question 5.7.2.2 Under which conditions should such a removal take place?

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### 6. The FCD and other Regulations/Directives

The proper functioning of the FCD also requires clarity regarding its interaction with other relevant legislation.

The Commission's services are interested in possible other legislation where provisions may not be sufficiently clear in their interaction with the FCD or vice versa.

Question 6.1 Is there any legislation where provisions are not sufficiently clear in terms of their interaction with the FCD or the other way round?

#### 6.1.1 Insolvency Regulation (Regulation (EU) 2015/848)

- Yes
- No
- Don't know / no opinion / not relevant

Please explain why you think the provisions of the **Insolvency Regulation** (**Regulation (EU) 2015/848)** are not sufficiently clear in terms of their interaction with the FCD or the other way round.

#### Please also explain how this matter might be solved:

5000 character(s) maximum

### 6.1.2 Second Chance Directive (Directive (EU) 2019/1023)

- Yes
- No
- Don't know / no opinion / not relevant

Please explain why you think the provisions of the Second Chance Directive (Directive (EU) 2019/1023) are not sufficiently clear in terms of their interaction with the FCD or the other way round.

#### Please also explain how this matter might be solved:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### 6.1.3 BRRD (Directive (EU) 2014/59/EU)

- Yes
- No
- Don't know / no opinion / not relevant

## Please explain why you think the provisions of the BRRD2 (Directive (EU)2019/879) are not sufficiently clear in terms of their interaction with the FCDortheotherwayround.

#### Please also explain how this matter might be solved:

5000 character(s) maximum

### 6.1.4 <u>Framework for the recovery and resolution of central counterparties</u> (Regulation (EU) 2021/23)

- Yes
- No
- Don't know / no opinion / not relevant

Please explain why you think the provisions of the Framework for the recovery and resolution of central counterparties (Regulation (EU) 2021/23) are not sufficiently clear in terms of their interaction with the FCD or the other way round.

#### Please also explain how this matter might be solved:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

# 6.1.5 If there is any other legislation where provisions are not sufficiently clear in terms of their interaction with the FCD or the other way round, please specify which ones, explain why, and explain how this matter might be solved:

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### 7. Other issues

The Commission's services are interested in possible other matters that you may have encountered in the context of the FCD that might be important for the review.

### Question 7.1 To what extent have inconsistencies in the transposition of the FCD caused cross-border issues, which would merit further harmonisation?

#### Please provide examples of such instances:

*5000 character(s) maximum* including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

### Question 7.2 How could we further enhance cross-border flows of financial collateral across the EU?

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

#### Question 7.3 Is there anything else you would like to mention?

5000 character(s) maximum

### **Additional information**

Should you wish to provide additional information (e.g. a position paper, report) or raise specific points not covered by the questionnaire, you can upload your additional document(s) below. Please make sure you do not include any personal data in the file you upload if you want to remain anonymous.

The maximum file size is 1 MB. You can upload several files. Only files of the type pdf,txt,doc,docx,odt,rtf are allowed
