(a) The Code constitutes the abbreviation of the relevant objective to which the economic activity is eligible to make a substantial contribution, as well as the Section number of the activity in the relevant Annex covering the objective, i.e.:

- Climate Change Mitigation: CCM
- Climate Change Adaptation: CCA
- Water and Marine Resources: WTR
- Circular Economy: CE
- Pollution Prevention and Control: PPC
- Biodiversity and ecosystems: BIO

For example, the Activity "Afforestation" would have the Code: CCM 1.1

Where activities are eligible to make a substantial contribution to more than one objective, the codes for all objectives should be indicated.

For example, if the operator reports that the activity "Construction of new buildings" makes a substantial contribution to climate change mitigation and circular economy, the code would be: CCM 7.1. / CE 3.1.

The same codes should be used in Sections A.1 and A.2 of this template.

- (b) Y - Yes, Taxonomy-eligible and Taxonomy-aligned activity with the relevant environmental objective  
 N - No, Taxonomy-eligible but not Taxonomy-aligned activity with the relevant environmental objective  
 N/EL – not eligible, Taxonomy non-eligible activity for the relevant environmental objective

(c) Where an economic activity contributes substantially to multiple environmental objectives, non-financial undertakings shall indicate, in bold, the most relevant environmental objective for the purpose of computing the KPIs of financial undertakings while avoiding double counting. In their respective KPIs, where the use of proceeds from the financing is not known, financial undertakings shall compute the financing of economic activities contributing to multiple environmental objectives under the most relevant environmental objective that is reported in bold in this template by non-financial undertakings. An environmental objective may only be reported in bold once in one row to avoid double counting of economic activities in the KPIs of financial undertakings. This shall not apply to the computation of Taxonomy-alignment of economic activities for financial

products defined in point (12) of Article 2 of Regulation (EU) 2019/2088. Non-financial undertakings shall also report the extent of eligibility and alignment per environmental objective, that includes alignment with each of environmental objectives for activities contributing substantially to several objectives, by using the template below:

	Proportion of turnover/Total turnover	
	Taxonomy-aligned per objective	Taxonomy-eligible per objective
CCM	%	%
CCA	%	%
WTR	%	%
CE	%	%
PPC	%	%
BIO	%	%

(d) The same activity may align with only one or more environmental objectives for which it is eligible.

(e) The same activity may be eligible and not aligned with the relevant environmental objectives.

(f) EL - Taxonomy eligible activity for the relevant objective  
 N/EL - Taxonomy non-eligible activity for the relevant objective

(g) Activities shall be reported in Section A.2 of this template only if they are not aligning to any environmental objective for which they are eligible. Activities that align to at least one environmental objective shall be reported in Section A.1 of this template.

(h) For an activity to be reported in Section A.1 all DNSH criteria and minimum safeguards shall be met. For activities listed under A2, columns (5) to (17) may be filled in on a voluntary basis by non-financial undertakings. Non-financial undertakings may indicate the substantial contribution and DNSH criteria that they meet or do not meet in Section A.2 by using: (a) for substantial contribution - Y/N and N/EL codes instead of EL and N/EL and (b) for DNSH – Y/N codes.

In their respective KPIs, where the use of proceeds from the financing is not known, financial undertakings shall compute the financing of economic activities contributing to multiple environmental objectives under the most relevant environmental objective that is reported in bold in this template by non-financial undertakings. An environmental objective may only be reported in bold once in one row to avoid double counting of economic activities in the KPIs of financial undertakings. This shall not apply to the computation of Taxonomy-alignment of economic activities for financial products defined in point (12) of Article 2 of Regulation (EU) 2019/2088. (h) For an activity to be reported in Section A.1 all DNSH criteria and minimum safeguards shall be met. For activities listed under A2, columns (5) to (17) may be filled in on a voluntary basis by non-financial undertakings. Non-financial undertakings may indicate the substantial contribution and DNSH criteria that they meet or do not meet in Section A.2 by using: (a) for substantial contribution - Y/N and N/EL codes instead of EL and N/EL and (b) for DNSH – Y/N codes.

‘This GAR shall contain disclosures for all the environmental objectives, with a breakdown for enabling activities. For the climate change mitigation, the GAR shall also contain disclosures of transitional activities. Credit institutions shall also provide disclosures of stock and flow.

For exposures where the use of proceeds is known, credit institutions shall consider, for the numerator of the GAR for financial undertakings, the gross carrying amount of loans and advances and debt securities of relevant accounting portfolios to financial undertakings to the extent and proportion in which those exposures finance Taxonomy-aligned economic activities. The assessment of whether that requirement has been met shall be based on information provided by the counterparty. Double counting shall not be allowed. Where the same exposure

is relevant for two environmental objectives, credit institutions shall allocate it to the most relevant objective.

For exposures where the use of proceeds is not known, the numerator of the GAR for financial undertakings shall be calculated based on the counterparties' KPIs calculated under this Regulation. The amount of loans and advances, debt securities and equity holdings of relevant accounting portfolios to financial undertakings to be considered in the numerator of the ratio shall be the sum of their gross carrying amount, weighted by the proportion of taxonomy-aligned economic activities with breakdown for all the environmental objectives and enabling activities for each counterparty. For the climate change mitigation objective, the breakdown shall also contain transitional activities for each counterparty.

Where the counterparty is another credit institution as defined in Article 4(1), point (1), of Regulation (EU) No 575/2013, and, only for this purpose, a multilateral development bank referred to in Article 117(1), second subparagraph, or Article 117(2) of that Regulation, the turnover-based and CapEx based KPIs used shall be the gross carrying amount of debt securities, loans and advances and equity instruments of relevant accounting portfolios weighted by the 'Total GAR of the counterparty', that is gross carrying amount multiplied by 'Total GAR' of the counterparty.';

Credit institutions shall disclose the KPI for their residential real estate lending portfolio as a proportion of loans to households collateralised by residential immovable property contributing to the relevant environmental objectives as laid down, in particular, in Sections 7.1, 7.2, 7.3, 7.4, 7.5, 7.6 and 7.7 of Annex I or Annex II to Commission Delegated Regulation (EU) 2021/2139 or Sections 3.1 and 3.2 of Annex II to [Environmental Delegated Act], compared to total loans to households collateralised by residential immovable property.';

The assessment of whether that requirement has been met shall be based on information provided by the public authority on the project or activities to which the proceeds will be applied. Credit institutions shall provide information on the type of economic activity that is funded. Double counting shall not be allowed. Where the same specialised lending exposure is relevant for two environmental objectives, credit institutions shall allocate it to the most relevant objective.’;
