line items Financial assets

Based on inspection findings between 2014 and 2018.

Examples of inspection findings

- + For individual impairment on specific loans, reliance on cash flow forecasts prepared by management without challenging or performing sufficient audit procedures to test these key assumptions and conclusions.
- + Failure to perform appropriate audit procedures on the portfolio loan loss provision.
- + No audit evidence obtained regarding completeness, accuracy and valuation of significant financial assets.
- + Significant variance between two valuations provided for the same asset not challenged by the auditor.

"Professional skepticism and expertise are key to audits in the banking industry. Training and tailored guidance by the audit firms are recommended to improve audit quality of bank audits."
